The Masterbuilt 7-in-1 Smoker & Grill Offers Great Flexibility for Backyard Chefs

Backyard barbecuers have become increasingly adventuresome and sophisticated, and experimentation with foods and appliances is the name of the game. Quick and convenient gas grills continue to be big sellers, but serious barbecuers want to try their hand at smoking and frying and more.

Masterbuilt's 7-in-1 Smoker® & Grill provides consumers with seven distinct cooking configurations: gas water smoking, gas grilling, charcoal smoking, charcoal grilling, deep frying, boiling & steaming and general camp cooking. This tremendous flexibility takes the outdoor chef a long way past hot dogs, steaks and hamburgers!

The 7-in-1 Smoker & Grill, which has long been the flagship grill for which the Company is known, is available in either a high-grade black steel finish or in solid stainless steel, both of which are durable and easily cleaned. The system features a porcelain flame disk bowl and cool-to-the-touch handles for ease and safety in moving and handling. It comes with a black solid steel 19-inch LP gas cooker stand, UL® Listed Type 1 regulator and hose, 10.5-quart aluminum pot, basket and thermometer. Its range of functions includes dual-level smoking, single level grilling, and a cooking stand with 10-quart pot for deep frying, boiling and steaming. Whatever you want to cook outdoors, this one versatile appliance can do it all.

The Masterbuilt 7-in-1 Smoker in stainless steel retails for \$199 and the black steel smoker for \$119. They are available at retail chains nationwide, or at www.masterbuilt.com.
